# Criteria VII: Institutional Values and Best Practices

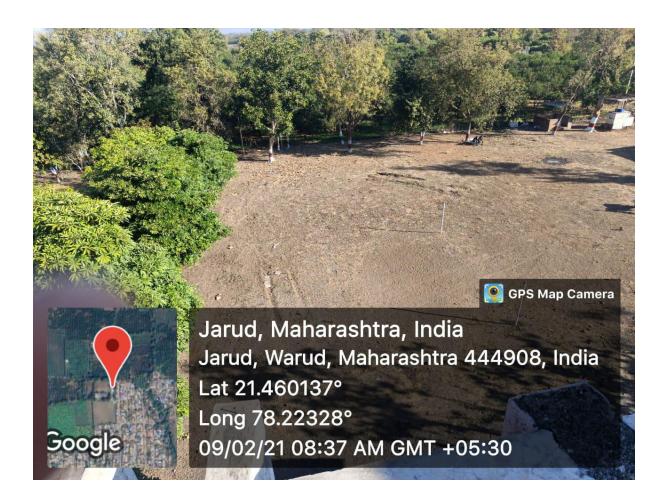

# 7.1.5 Green Campus Initiative

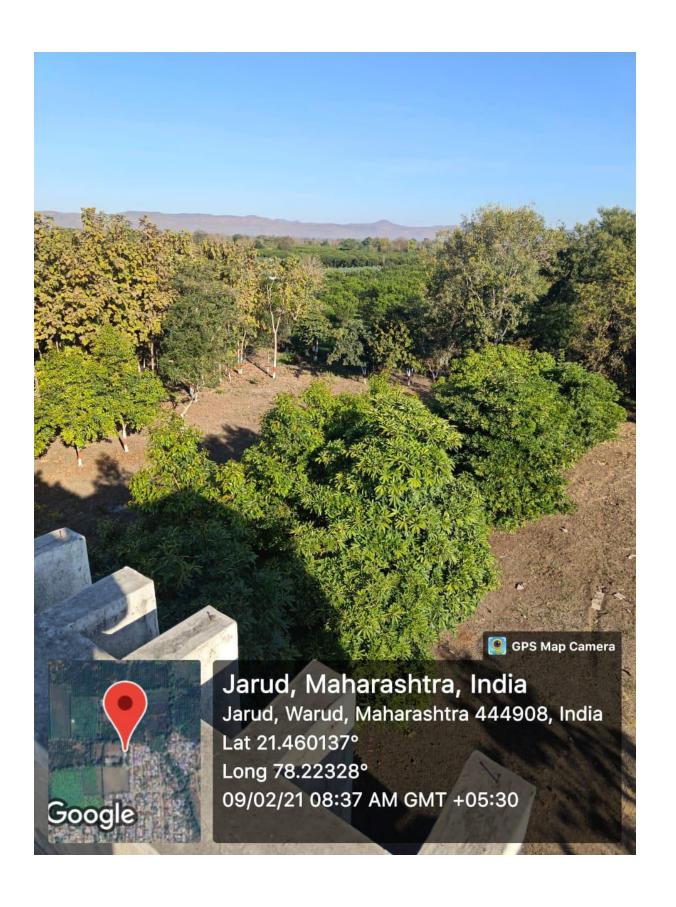

The college takes care of the environment in every possible way. The college has added advantage of being located in an area and surrounded by orange orchids and other fields. The college campus, too, has been maintained in a way to keep environmental balance.

One of the best practice of the college is of 'Green Campus'. The college has planted, developed and maintained the trees since last 8 years. We have taken every possible care in keeping the planted trees alive. For that we gave responsibility of maintenance of almost all trees to teachers and students.

Also, the college has done the Green Audit too, through registered agency, of which the report is attached with this.

# CHAPTER III STUDY OF CARBON FOOTPRINTING

A Carbon Foot print is defined as the Total Greenhouse Gas emissions, emitted due to various activities.

In this we compute the emissions of Carbon-Di-Oxide, by usage of the various forms of Energy used by the College for performing its day to day activities

The College uses Electrical Energy as the Energy Source.

#### Basis for computation of CO<sub>2</sub> Emissions:

1 kWh of Electrical Energy releases 0.9 Kg of CO<sub>2</sub> into atmosphere

Based on the above Data we compute the  $CO_2$  emissions which are being released in to the atmosphere by the College due to its Day to Day operations

Table No 4: Month wise CO<sub>2</sub> Emissions:

No	Month	Energy Purchased, kWh	CO <sub>2</sub> Emissions, MT
